With dual cockpits and a modular adaptable mission system, Scorpion is the ideal platform to train tomorrow’s tactical aviators, from the basics of jet operations to employing multi-spectral sensors and precision guided weapons. Scorpion features Textron’s TRU Simulation + Training, which leverages the best of commercial and military aviation training with state-of-the-art immersive Real Feel® and Real Cue™ simulation and a comprehensive Live – Virtual – Constructive (LVC) training environment.

Together, Scorpion and Textron’s TRU Simulation + Training systems provide a diverse focus on situational simulations such as combat, state security, humanitarian assistance and law enforcement operations.

HARDWARE AND SOFTWARE

- Desktop Pilot and Maintenance Simulators
- Computer Based Training Systems
- Visual Dome Full Mission Simulators
- Tactical Combat Simulators

MISSION TRAINING SYSTEMS

- Tactical Jet Flight Training
- Tactical Employment of Mission Systems
- Exploitation of Multi-Spectral Sensor Systems
- Military and Commercial Voice and Data Communication Systems
